EnviroAnode® LT (MMO) Wire

Cathodic protection made simple

SAE Inc. offers innovative products that help you maintain the safety and integrity of your pipelines, while complying with industry regulations. The EnviroAnode® LT System for impressed current cathodic protection (ICCP) is a premium product aimed at applications that demand high performance, long life and environmental compliance. The EnviroAnode® LT System offers the following value proposition:

- Lower resistance for higher output currents with low DC voltage sources
- Active zone completely sealed against any aquifer contamination sources
- Optional watering designs available for very dry locales
- No ground bed surface materials - livestock and landowner friendly
- Anti-theft and lower maintenance

EnviroAnode® LT System is a linear MMO anode that is suitable for poor soil conditions. The system installs like traditional Cathodic Protection Systems and is available in both a horizontal or vertical option.
