Why Choose SAE Products?

- Significantly **improve personnel safety**
- **Save money** by improving your ROI on installed assets
- Gain **better performance** with increased infrastructure reliability and performance
- Ensure **happier customers** from lower risk of catastrophic failures and service outages

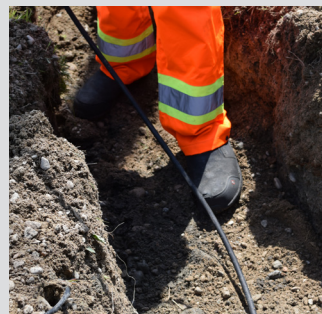

**CONDU
DISC**

The corrosion proof ground plate that lasts the life of the asset

**CONDU
CRETE**

Superior ground enhancement material that significantly reduces electrode corrosion

**CONDU
WIRE**

Conductively jacketed wire designed to dramatically extend the life of ground grid and counterpoise installations

**CONDU
ROD**

A better performing, increased surface area, corrosion proof ground rod

**CONDU
FLOW**

The pourable, dust free, conductive backfill that significantly improves resistance to ground

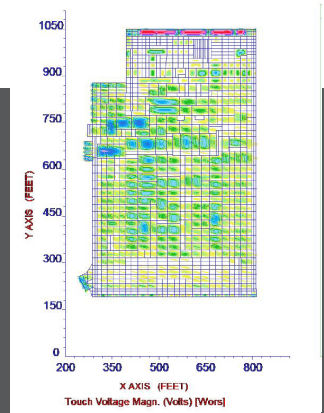

Temporary Protective Grounding Products

TPG

SAE Engineering Design Services

Full-service grounding surveys and engineering design work to provide your power utility, telecommunication, or other critical infrastructure facility with superior electrical protection.
