

# The Why behind our ConduWire

Conductive. Not Insulating.

Low permeability to water ... means  
**VIRTUALLY NO CORROSION!**

Low resistance ...  
means **EQUIVALENT TO BARE WIRE!**

## Why do you need a Conductive Jacket?

1. Low impedance ground wire  
**Use ConduWire exactly like bare wire**
2. Virtually no corrosion, functions when you need it  
**Install ConduWire and forget it**
3. No change in work methods  
**Easy to install; strip & connect with existing tools**

**VIRTUALLY NO CORROSION**  
with ConduWire!

Use exactly like you  
would in all bare wire  
applications, with the  
added benefit of  
**VIRTUALLY NO**  
**CORROSION.**

## Accelerated Corrosion Testing

Copper  
#2

Galvanized  
Steel 0.25"

Copper  
#2

Galvanized  
Steel 0.25"

All 4 samples were  
exposed to identical  
conditions.

Bare wire failed.  
ConduWire did not.

It's that simple.

Regular Wire

Sold in reels or  
prefabricated coils

**What does your  
buried wire look like?**
